

FOR IMMEDIATE RELEASE – 5 March 2008

**Amarinth expand to gain a firm foothold
in the Norwegian North Sea sector**

Amarinth, a leading company specialising in the design, application and manufacture of pumps and associated equipment used in the petrochemical industry, has underlined its expanding export business with the appointment of a new agent in the Scandinavian market, TUROteknikk AS of Norway. This new relationship has already yielded a significant order from DONG Energy, the Nordic’s leading energy group.

Following on from the recent appointment of Chris Ryan as export manager, the selection of TUROteknikk, based near Oslo, Norway, enables Amarith to establish a firm foothold in the Scandinavian market, with a particular focus on business within the active Norwegian sector of the North Sea. Amarith can now mirror the successful strategies that have seen it grow to a dominant provider to the oil and gas industry in the UK sector.

This new partnership with TUROteknikk has already delivered a significant order that will see Amarith supplying three new API 610 pumps to DONG Energy. These pumps will replace worn out Girdlestone water injection pumps that are used on oil platforms in the North Sea Siri field. The pumps, installed in the most arduous of conditions, once again demonstrate why Amarith has become synonymous with providing North Sea operators with highly reliable, robust pumping solutions delivered on tight timescales.

– MORE –

Oliver Brigginsshaw, Managing Director of Amarith, commented: “Despite the well discussed downturn in the UK economy there are still plenty of opportunities for business in the North Sea. With oil prices at an all time high, Amarith is better placed than most to capitalise on new opportunities, particularly following our new agency agreement with TUROteknikk.”

NOTES TO EDITORS:

Founded in 2002, Amarith has harnessed the skills, creativity and passion of people who have worked in the pump industry for many years. Amarith delivers world-leading expertise in the design, application and manufacture of centrifugal pumps and associated equipment to ISO, ANSI & API standards, primarily for the industrial, chemical & petrochemical markets. Their portfolio includes:

- **Pumps:** Horizontal and vertical API 610 pumps, chemical and industrial pumps, many of which are interchangeable with the Girdlestone pump ranges, eliminating the need for expensive modifications when replacements are required.
- **Pressure Vessels:** Protect System Plan 52 and 53A and 53B sealant systems with inbuilt condition monitoring for pumps and mixers that are suitable for Safe area up to Zone I.
- **Spares & Service:** High quality, fast lead-time re-engineered spare parts to improve performance and extend pump life, including many which are directly interchangeable with the Girdlestone pump ranges.
- **Packages & Modules:** Condensate Recovery Units manufactured for Spirax Sarco incorporating the innovative Ci-Nergy intelligent variable speed control system, plus bespoke packages & skids built to order.
- **Business Systems:** state-of-the-art e-commerce technologies that deliver 24/7 support enabling customers to select pumps and place orders on-line and then track every stage of manufacture through to delivery, any time, anywhere in the world.

The company operates globally from its base in Rendlesham Suffolk, United Kingdom and has a customer base of world-leading companies, including BP, Shell, ExxonMobil, GlaxoSmithKline, Pfizer, Spirax Sarco, Diageo, AMEC, Fluor and Halliburton.
