Amarinth And Ethosenergy Form Strategic Alliance For Delivering Oil And Gas Pump Solutions In The UAE

Amarinth, a world-leading, net-zero designer and manufacturer of low lifecycle cost centrifugal pumps and associated equipment, primarily for the offshore and onshore oil and gas industries; nuclear and renewable energy generation; defence; desalination; process and industrial markets, announces a strengthened partnership with EthosEnergy to deliver regional product and after sales support of Amarinth's range of oil and gas pumps in the United Arab Emirates.

EthosEnergy, with over four decades of experience in the oil and gas sector, aligns seamlessly with Amarinth's commitment to excellence. As the leading independent provider of rotating equipment services, EthosEnergy offers a full range of solutions including repair,

optimisation, upgrades, and replacement parts for onshore and offshore field services. EthosEnergy's proven track record in upstream, midstream, and downstream processes makes it the ideal partner for delivering regional product and after-sales support for Amarinth's proven range of oil and gas pumps that are used in the most challenging environments across the Middle East.

This strategic collaboration further underlines Amarinth's investment in the regional oil and gas sector, emphasising its commitment to in-country support through expanded facilities. Building on EthosEnergy's existing knowledge and expertise, Amarinth will equip engineers with relevant training, ensuring they have the necessary skills to maintain Amarinth's recognised standards. In turn, EthosEnergy will contribute local personnel and state-of-the-art facilities in the UAE to provide seamless technical support.

This alliance enables oil and gas organisations in the region to have easier access to localised expertise for commissioning, maintaining Amarinth's API 610 and API 685 horizontal, vertical, and vertical in-line pumps. This not only boosts In-Country Value but also allows those organisations to select a high-quality, Amarinth-trained local supplier. This ensures the fulfilment of diverse needs, ranging from new Amarinth pumps to cost-effective replacements and refurbishments, as well as Amarinth's re-engineered spares for obsolete pumps from other OEMs where the original manufacturer has ceased operations.

Oliver Brigginshaw, Managing Director of Amarinth, expresses his enthusiasm for the collaboration, stating, "We are delighted to sign this agreement with EthosEnergy, expanding our in-country presence and enabling us to deliver more local high-quality support to organisations operating in this region. Whether they require new Amarinth pumps, cost-effective replacements, or refurbishment of existing pumps, our partnership with EthosEnergy ensures unmatched excellence in product and service delivery."

"EthosEnergy has built a reputation for exceptional service and expertise in the UAE's oil and gas sector," says Mario Cincotta, Executive VP – East Hemisphere at EthosEnergy. "Partnering with Amarinth allows us to leverage our combined strengths and deliver unparalleled product support and after-sales solutions to our customers. Together, we'll ensure local teams have the training and resources required to maintain Amarinth's renowned pump technology, maximising uptime and efficiency for regional operations."
