

FOR IMMEDIATE RELEASE – 3 April 2023

**Amarinth secures order from Azku Global Services for \$200K
of API 610 OHI pumps for Majnoon Oil Field, Iraq**

Amarinth, a world-leading, net-zero designer and manufacturer of low lifecycle cost centrifugal pumps and associated equipment, primarily for the offshore and onshore oil & gas industries; nuclear and renewable energy generation; defence; desalination; process and industrial markets, has secured an order from Azku Global Services for \$200K of API 610 OHI pumps destined for the Iraqi Ministry of Oil operated Majnoon Oil Field.

This is Amarith's first order from Azku Global Services and comes off the back of numerous projects that Amarith has successfully delivered into Iraq. The \$200K order is for two API 610 12th edition OHI pumps which are destined for Majnoon Oil Field operated by the Iraqi Ministry of Oil. The Majnoon Oil Field is a super-giant oil field located 60km from Basra in southern Iraq and is one of the richest oil fields in the world. The field is 52km-long, 15km-wide, includes 13 different oil and gas reservoirs, and has an estimated 38 billion barrels of oil in place.

The API 610 12th edition OHI pumps are for condensate transfer duties and include the latest API 682 4th edition Plan 53B seal support systems along with Amarith mobile top-up units. Specified for ATEX Zone I use, the pumps are required on an aggressive 30-week delivery. On completion, they will be inspected and witness tested by Bureau Veritas, and supplied with a full legalised Iraq documentation package.

Oliver Brigginsshaw, Managing Director of Amarith, commented: “We are delighted to receive this first order Azku Global Services which further strengthens our reputation in Iraq for successfully delivering robust and reliable pumping solutions on short lead times for its expanding oil and gas infrastructure. Our ability to meet these aggressive delivery deadlines is assisted by the in-depth knowledge we developed across our organisation of the documentation and legislative processes required to supply pumps to Iraq.”

Amarinth API 610 OHI pump with API 682 Plan 53B Seal Support System

NOTES TO EDITORS:

Amarinth is a carbon net zero organisation delivering world-leading expertise in the design, application and manufacture of centrifugal pumps and associated equipment for critical applications in many of the most arduous and hostile environments around the globe.

Founded in 2002, Amarith has harnessed the skills, creativity and passion of people who have worked in the pump industry for decades, delivering bespoke API and ISO pumps primarily to the offshore and onshore oil & gas industries; nuclear and renewable energy generation; defence; desalination; process and industrial markets.

The company's innovative approach, business agility and use of sophisticated computer applications enables it to deliver robust, reliable and sustainable pumping solutions on the shortest lead times in the industry.

Amarinth's portfolio includes:

- **Process pumps** – API 610, API 685, ISO 5199 horizontal, vertical and in-line bespoke process pumps, including ones that are hydraulically and dimensionally interchangeable with the former Girdlestone and other obsolete pumps.
- **Skid packages and modules** – Supplied with a variety of drives for applications including de-sanding, mixing, filtration and chemical injection and tailored for the oil & gas, water treatment and power generation industries.
- **Condensate recovery** – Cutting-edge design providing low NPSH up to 98°C with variable speed drives to reduce cycle time and lower operating costs, available in stainless steel, galvanised or copper tanks for light or heavy industrial uses.
- **Seal support** – Integrated pressurised and vented seal support systems designed and delivered to API 682 and ISO 5199 standards and specific site specifications and requirements, working closely with AES, Eagle Burgmann, John Crane and Protect System.
- **Spare parts** – Critical spares for all Amarith pumps and related components can be dispatched the same day, reducing potential downtime, and in addition components for the former Girdlestone and other obsolete pumps can be re-engineered often improving the performance of existing assets.
- **Services** – A full range of pump related services, delivered from UK head office or on-site globally, onshore or off-shore, including full commissioning and start-up support; also strip, report and refurbishment of any pump regardless of manufacturer.

Amarinth operates globally from its base in Rendlesham Suffolk, United Kingdom and offices in the Middle East and Malaysia with a global customer base, including BP, Shell, ADNOC, NOV, ExxonMobil, Schlumberger, COSCO, EDF, GlaxoSmithKline, Saudi Aramco, Pfizer, Diageo, Kuwait Oil Company, AMEC, Fluor, LUKOIL, Halliburton, and Babcock.
